

Luis Carlos Pando — Resume (English)

Front-end & WordPress Developer

Chihuahua, Mexico · +52 614 177 4577 · hey@luiscarlospando.com · luiscarlospando.com

Summary

Front-end developer with 13+ years of experience building websites and web applications for agencies and brands in Mexico. My work ranges from interactive infographics for Discovery Channel Latin America to database-driven platforms with custom backend integrations.

I work across the full delivery cycle: interface design in Figma, responsive front-end development with React, Next.js and Tailwind, custom WordPress and WooCommerce builds, and the hosting, security and maintenance that keep sites running after launch.

Work experience

Front-end Developer — Mixen: Boosting Brands

Chihuahua, Mexico · Oct 2019 – Present

I design and develop websites and web applications aligned with the agency's marketing strategies and its clients' business goals. I work closely with the creative and marketing teams so that every site is visually strong, easy to use, and effective at promoting the client's brand and products.

I also own the ongoing health of the agency's client portfolio: maintenance and updates, SEO optimization, security, and making sure every site is responsive and accessible. On larger projects I collaborate with other developers and designers, providing technical direction throughout development.

- Maintain a portfolio of ~60 client websites, handling updates, hosting, performance and SEO.
- Led a security remediation across the hosting portfolio: removed spam injections, PHP backdoors, cloaking malware and rogue admin accounts, then restored sites' standing in Google Search Console.

- Built the website for Castallia event venue, with a custom quote calculator, events listing and photo gallery, using custom WordPress taxonomies to organize venues and event types.
- Built the Century 21 Census real estate site, integrated directly with Century 21's property database to power home search and sales agent profiles.
- Delivered multiple admin portals and public websites for business units of Grupo Bafar, one of the largest consumer goods companies in the region.
- Led the front-end redesign and development of Tiempo.com.mx, a regional news outlet.
- Other accounts: Codetec, Compecer, CTU.

Freelance Web Developer — CTU

Chihuahua, Mexico · Mar 2026 – Apr 2026

I led the full rebuild of the website for Distrito Uno (D1), a premium commercial complex, migrating it from React to a custom, client-manageable WordPress platform.

- Built a custom content management setup with custom post types and ACF fields so the client's team can update the site without a developer.
- Developed an events calendar and management system with FullCalendar and custom REST API endpoints.
- Added site-wide search and a contact form integration.

Front-end Developer — Movimiento Digital

Chihuahua, Mexico · Mar 2018 – Oct 2019

I developed interactive educational content for "Discovery en la Escuela", Discovery Channel Latin America's education program, working with content and design teams to turn curriculum material into engaging experiences for students across the region.

- Built interactive infographics, games and quizzes for the program.
- Developed, managed and maintained the program's LATAM-wide portal, serving audiences across Latin America (now retired).

Front-end Developer — Xpectare Interactive Media

Chihuahua, Mexico · Mar 2013 – Mar 2018

I developed websites for media outlets, events and brands, from digital newspapers to high-traffic event portals, collaborating with designers and other developers from concept to launch and maintenance.

- Developed and co-led the redesign of the digital newspapers Entre Líneas and La Opción de Chihuahua.
- Built and maintained several annual editions of the OXXO 21K half marathon portal (Chihuahua and Querétaro).
- Worked on the website redesign for travel agency Mundo Joven.
- Other accounts: Castalia, CTU, Dimanor, The Lofts, Urbemex, GoalTech.

Skills

- **Front-end:** HTML & CSS, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, Bootstrap, responsive design, web accessibility
- **CMS & e-commerce:** WordPress (custom themes, custom post types, ACF), WooCommerce
- **Back-end & data:** PHP, Node.js, REST APIs, MySQL, PostgreSQL, Supabase
- **Design:** Figma, UI implementation from design systems
- **Operations:** Git, server and hosting management, WordPress security and malware remediation, SEO, technical support
- **AI-assisted development:** Claude Code

Personal projects

- [Hitz.mx](#) — Designed and developed a platform for the Mexican music scene, with profiles for bands, venues and promoters, a chronological social feed and an events calendar. Built with Next.js and Supabase (PostgreSQL).
